The Actions of our hotels:

- Sustainability program
- "We use LED spotlights IN OUR rooms and facilities.
- Efficient air conditioners in good condition will be continually checked and installed.
- Measures will be implemented to regulate the use of drinking water in the facilities.
- Sanitary equipment and water-saving showers were installed, giving them adequate maintenance to avoid leaks.

- Room towels are reused to provide service in the Pool, thus promoting recycling, and Guests are also informed of the option of avoiding changing their linens daily, to avoid frequent washing and save more water, promoting ecological culture within our guests.
- Participation in Waste Collection and Separation Campaigns within the Municipality.
- It was implemented within the Restaurant not to use plastics as straws.
- Guests and Employees are made aware through Talks and Signage about the Official No Smoking Regulations within the Hotel Facilities, thus promoting the Ecological Culture of non-contamination with cigarette butt waste.
- Seasonal fruits from local businesses are used, thus stimulating the economy.
- Facilities that were built with materials from the region without impacting or damaging the environment.
- The interior gardens are maintained with plants typical of the region which provide green spaces for our guests to rest.
- Ecological and biodegradable products will be implemented.
- Controlled fumigation with biodegradable pesticides.
- Elimination of plastic bottles and replacement with water bottles or jugs.
- Use of soap and shampoo dispensers instead of individual containers."

The Actions of our buses:

In collaboration with federal authorities, we face new mobility challenges and promote projects aimed at environmental conservation.

We design actions to evaluate and operate efficient and sustainable solutions on issues of:

- Reforestation
- Saving water and energy
- Rainwater collection
- Use of biofuels and UREA solutions with SCR technology
